The Mountains

Heavenly -

With lift service to 10,040 feet, Heavenly is Tahoe's highest mountain. 4,300 acres, 97 runs, 30 lifts and four base facilities spanning across two states, and Heavenly is also one of North America's largest mountains. If this doesn't get your heart racing, just wait. Heavenly averages 360 inches of snow annually and has one of the United State's largest snowmaking systems covering 70% of the mountain. www.skiheavenly.com

Kirkwood -

Kirkwood's unique location about 35 miles southwest of South Lake Tahoe atop the Sierra Crest, combined with elevations ranging 7,800 to 9,800 feet, creates a geographical predisposition to receiving the lightest, the driest, and the most plentiful snow in the Tahoe region. With 2,000 feet of vertical drop, and over 2,300 acres of terrain -- from calm groomed beginner runs, to hair raising cornices, cliffs and the most high-angle grooming around -- there's something for everyone at the 'Wood. www.kirkwood.com

Northstar -

Northstar California, previously known as Northstar-at-Tahoe, is located near the north shore of Lake Tahoe and is home to over 3,000 acres of skiable terrain. The resort is home to impeccable grooming, incredible tree skiing and a variety of terrain options suitable for any ability level. The resort also contains world-class terrain parks and a 22-foot superpipe designed by Olympian Shaun White. Check out Northstar's Pinball Park that is considered to be one of the best all around terrain parks in the country. www.northstarcalifornia.com
